

June 21, 2017

Parents and Guardians,

Our school nurses will begin using CareDox in August when the new school year begins. CareDox is a digital version of the school's district previous health information system.

- CareDox will allow parents/guardians to complete health information online. Once information is on CareDox, you simply update the parts that change from year-to-year which will allow you to skip filling out the paper form every year.
- CareDox will allow you to receive instant notifications from the school nurse so you know what happens with your child's health at school, when it happens.

If you have questions or need help signing up please contact your child's school nurse.

Thank you,

Mary Hall, RN BSN
Supervisor of Health Services
Pulaski County Public Schools
